EDUCATION

Politecnico di Milano, Milan	Ongoing
Masters of Science in Computer Science and Engineering	2024-26
Maharaja Agrasen Institute of Technology, Delhi	CGPA- 9.1
Bachelors of Technology in Information Technology	2020-24

PROJECTS

- Expense Tracking App** *TypeScript, HTML, CSS, Git/GitHub, Vite* 
- Built full-stack expense tracking functionality enabling users to add, edit, and categorize expenses.
 - Configured development environment and deployed project to GitHub Pages for public access.
 - Data management done locally and hence data is secure.

- TrackFit (Workout Logging App)** *TypeScript, Vite, Expo, JavaScript, Git, Supabase* 
- Developed workout logging interface that enables users to add and track exercises and sessions.
 - Translated Figma UI/UX designs into responsive front-end components.
 - Integrated Supabase (PostgreSQL backend) to manage persistent application data, including CRUD operations and real-time synchronization.
 - Deployed application for public access and used by 50+ users at Polimi gym.

- Lightshifter videogame** *C#, Unity, Github* 
- Developed gameplay systems and mechanics using Unity and participated in iterative development cycles, debugging, and playtesting to refine gameplay experience.
 - Secured 2nd place in the peer evaluation

Neural Style Transfer System Using CNN *Python, Tensorflow*

- Trained and compared VGG and Resnet Based NST system.
- Extracted best of the model and made it robust .
- User can choose different art styles and transfer their pictures into those styles.

PROFESSIONAL EXPERIENCE

Olympic Broadcasting Services (Milano Cortina 2026) **January 2026 - March 2026** *Video Logger, Milano, Italy*

- One of the 100 out of 1000+ applicants selected after 5 days of extensive training.
